

## THE BANDIT SERIES NEW FOR 2022

The Bandit Series opener was born from a need for a seeding/banding tool with industry-leading durability and versatility. Built out of hardened materials to take the punishment of high-speed deep banding and still offer accuracy and durability while seeding. The result is a multifunctional opener with extremely low soil disturbance.

**“Dutch Bandit opener is very simple with no maintenance required and easy adjustment. NH3 gassing off was completely eliminated with these openers. Our field finish was excellent due to very low soil disturbance.”**
