

INTRODUCING THE SEED HAWK HEAVY DUTY (HD) SERIES

The Seed Hawk HD Series was engineered with durability and versatility for producers who are looking for an opener that will stand the test of time. The Seed Hawk HD opener uses a unique tang style tip that stays tight and securely attached in the rockiest field conditions. Bolt on replaceable tubes offer the producer multiple options and the ability to quickly change with any changes in your farming practices.

"Our Seed Hawk drill and fertilizer openers pulled out a lot of stones, so we wanted a different style of opener that would not pull stones or break. We tested two types of Dutch fertilizer knives. Dutch Territory Manager, Connor Bohachewski came with a Dutch engineer and installed them on our drill. That was very impressive as we've never had any other company do that. Dutch offers excellent products and their staff is great to work with. The company is always innovating to meet the needs of the producer. We want to thank Dutch for choosing us to test their products on our drill, and designing an opener that worked in our rocky field conditions."
