VÄDERSTAD (SEED HAWK)

SEED HAWK INLINE SEEDING SYSTEM

"The trash clearance was phenomenal with my Dutch Inline Seed Shanks to fit Seed Hawk. I never had to lift my shanks up once during seeding, which was a complete day and night difference from my OEM openers. The seed placement was exactly where I set it to be even in tough seeding conditions."

Product Highlights

- **Inline system clears trash and eliminates the clumping and dumping compared to OEM**
- Allows you to easily switch between side-band and paired row tips
- Seed delivery directly behind the cutting edge allows for near perfect seed placement
- Alpine tubes available

"We have run the Dutch Inline seed knives for 2 seasons with no plugging and no trash buildup between the shanks, and the flow of trash and soil is excellent. Seed placement is perfect and with around 15,000 acres on the tips, we see no reason to change them as they wear very well."

GRAHAM DOUGLASS, BASSANO, AB
