# PHANTOM SERIES

The Phantom series combines the best performance attributes of the low disturbance Precision Edge series with a new plug free granular fertilizer opener. Introduced to the market with 15" row spacing in mind, the 6.5" paired row fit perfectly with your modern Horsch or Amity/Concord drill. With an easily replaceable tip and paired row wings, the Phantom Series opener is setting a new standard in wide-paired row seed and fertilizer placement.

## Product Highlights

- 1/2" replaceable tip with carbided nose and wings protects the body while the tang style attachment method offers industry leading durability.
- Durable Steel body with mud deflectors and additional hard facing for extended wear.
- 6.5" replaceable paired row wing section designed to fracture less soil and create a well-defined seed shelf.
- Vertical tip attack angle deflects stones and prevents potential opener damage.
- Larger seed and fertilizer openings ensures plug free performance with high rates and large seed sizes common to 15" row spacing.
